

Maxi-Fence Medium Mesh

Secure Post System

The panels are fixed laterally onto the posts and secured with anti-vandal metal security fixators. The H-shape welded tubular posts (70 x 44mm), are galvanised PVC coated, and supplied complete with a polyamide cap and accessories.

Square Post System

The panels are fixed on the front side of the posts by means of fixtators and security bolts. The welded square tubular posts (76 x 76 x 1.60mm) have inserts for fixing the panels with the fixators and are covered with a plastic cap.

Panels

The panels are 3000mm wide and range from heights of 1730mm to 2430mm. The panels have vertical barbs of 30mm on one side and are reversible (barbs at top or at bottom). Mesh sizes are 200 x 50mm. The wire diameter is 4,4 mm (core wire: 3.960mm)

Gates

The Medium Mesh complete system offers optimal protection when combined with the latest swing and sliding gates: Nylofor and Robusta.

Coating Techniques

PVC Coating: Zincalu® panels are sealed with an adhesion epoxy coating prior to the PVC coating to ensure a perfect bond.

Maxidor coatings (PVC and Zincalu) are highly recommended for applications in high corrosion environments such as along the coast or industrial areas.

Colours

Nylofor 3-M is available in green RAL 6005 or anthracite RAL 7021

10-Year Guarantee

The state of the art PVC coating technology ensures that we are able to offer a 10-year anti-corrosion guarantee on the system when used in full (Post-Panel-Post).

Attractive Design

Secure Post System

Extra-Long Lifetime

Benefits

Excellent Price/Quality Rate

The extra wide panels (3 metres) in combination with the PVC coated system (post and accessories), guarantee quality and longevity. Excellent for long distance fencing as less posts are needed.

Extra Long Lifetime

Maxidor's coating technology is state of the art and guarantees an extra long product life span. A special layer is applied after galvanising to ensure total adhesion of the PVC top coat.

Fast & Easy Installation

Due to the 3 metre wide panels, less poles and digging is needed, making it faster and fence to install over long distances

Rigidity

Heavy welded mesh panels with rectangular apertures and horizontal reinforcements guarantee excellent rigidity.

Complete system

We can custom make any solution required. Contact us today.
