Quality Warranty on posts: Hot dipped Galvanized & Powder Coated - 3 Year warranty (coastal application), 5 year warranty (inland application)

As an ISO certified company the quality of our products is paramount to our success.

All our products meet the highest standards and **PVC coated systems** are guaranteed against corrosion for 10-years.

Post and Fixing

1800mm high : Square post (76x76x1.6mm) x 2400mm high (Powder Coated - HDG on request)

2000mm high : Square post (76x76x1.6mm) x 2600mm high (Powder Coated - HDG on request)

2400mm high : Square post (76x76x1.6mm) x 3000mm high (Powder Coated - HDG on request)

Square Post System:

The panels are fixed onto the front or back of the posts by means of fixators and security bolts. The welded square tubular posts have inserts to fix the panels with the fixators, and are covered with a plastic cap. Posts are corrosion treated and powder coated or hot dipped galvanized and powder coated on request.

IPE Post System:

The panels are fixed laterally onto the posts and secured with anti-vandal metal security fixators.

The IPE posts (100x55mm), and are hot dipped galvanized, with the option of powder coating or PVC coating.

Benefits

DURABILITY

Multiple V-bends, high tensile wire of up to 745MPa, with a vertical wire arrangement adds increased rigidity to our range of wire fence panels. Offering maximum protection to perimeter fences and property assets. Maxidor wire fence panels are supported by a 10-year warranty provided that the product is PVC coated

VANDAL RESISTANT

Apart from our unique product design, which makes climbing and cutting difficult, all our barrier solutions are installed with a unique anti-tamper fixator solution which further eliminates the possibility of intruders gaining access to your property.

DESIGN

Our products were created with the core focus of security, whilst offering a seamless and stylish security barrier. Our wire fence panels are aesthetically pleasing with high visibility creating a sense of freedom without compromising on security requirements.

INSTALLATION

Our fencing panels can be supplied with a pre-galv finish & can be combined with either square or IPE posts.
