Maxidor

No Better Way To Secure Your Family

Expandable Security Gates: Maxidor **Ultra**

- ✓ Express Delivery
- ✓ 5 Year Product Guarantee
- ✓ Ultra-modern design
- ✓ 2 x Standard Slamlocks - 4 locking points
- ✓ Aluminium Top & Bottom Tracks - anti-trip design

Nylon Components

- High grade nylon components between all metal-on-metal parts
- Prevents corrosion, protects paint finish and ensures product longevity

Strong Flights

- Extra thick steel brace unique to Maxidor
- Difficult to cut through using common tools
- Buys valuable time in the event of an attack

Slamlock

- Independent lock that will slam closed without the use of a key for an instant barrier
- SABS tested to withstand a pull force up to 2.6 Tonnes
- Unique lock channel cover prevents prying tools

Double Upright Design

- Square tubes used in double upright design for strength
- Our double upright design puts 13.6 mm of steel between you and a possible threat

T.G.I.C Grade Powder Coating

- UV stabilised TGIC grade for even finish that will not fade or yellow in the sun
- Available in two standard colours: White and bronze
- Can be made to match any colour on request (please ask for a "special colour price")

Chemical Fastening

- Chemical-fastener is used to form a permanent bond between fixing material and wall
- This prevents the barrier from being ripped out of the wall

Security Gates | Doors: Maxi-Gate **Ultra**

- ✓ High Security Lock
- ✓ Styled Flights
- ✓ Express Delivery
- ✓ 5 Year Product Guarantee

Design

- Can be customised to accommodate an opening for pets
- Curved shape of the flight for aesthetic appeal and consistent look across the range
- Stainless steel rivets will not rust or tarnish
- Advanced welding methods provide superior strength

High Security Lock

- Double turn locking mechanism ensuring a deadlock
- 22mm latch extends onto the locking beam resulting in superior strength
- Provides higher security than traditional lever locks
- Durable for long life operation

T.G.I.C Grade Powder Coating

- UV stabilised TGIC grade for even finish that will not fade or yellow in the sun
- Available in two standard colours: White and bronze
- Can be made to match any colour on request (please ask for a "special colour price")

Chemical Fastening

- Chemical-fastener is used to form a permanent bond between fixing material and wall
- This prevents the barrier from being ripped out of the wall

Burglar Bars: Maxi-Grill **Ultra**

Design

- Modular design can be installed to any shape
- Style flights provides additional stability to barrier
- Curved shape of flight for aesthetic appeal and consistent look across range
- Unique lug channel fits flush with the reveal to hide screws and leave no room for prying tools
- Screws cannot be tampered with

T.G.I.C Grade Powder Coating

- UV stabilised TGIC grade for even finish that will not fade or yellow in the sun
- Available in two standard colours: White and bronze
- Can be made to match any colour on request (please ask for a "special colour price")

Chemical Fastening

- Chemical-fastener is used to form a permanent bond between fixing material and wall
- This prevents the barrier from being ripped out of the wall

Roller Shutter: Maxi-Shutter **Classic**

Perforated

Solid

Manual

Motorised

Operation

- Motorised or manual operation
- Manual operation with crank, push up or chain
- Every motorised shutter comes standard with a surge protection plug to protect motor
- Motor can be installed inside shaft to take up less space in canopy

Nylon Components

- Custom shaped nylon end plates wrap around each slat to prevent metal-on-metal contact for corrosion and rust prevention

T.G.I.C Grade Powder Coating

- UV stabilised TGIC grade for even finish that will not fade or yellow in the sun
- Available in two standard colours: White and bronze
- Can be made to match any colour on request (please ask for a "special colour price")

Chemical Fastening

- Chemical-fastener is used to form a permanent bond between fixing material and wall
- This prevents the barrier from being ripped out of the wall

Design

- Hexagonal shaped canopy that appears smaller than square box
- Neat finish achieved by using flat bars to join guides to support beams
- Wide range of available styled slats for freedom of choice in design and visibility
